SPILL CONTAINMENT PRODUCTS

Significant damage to the environment from continuous spillage from 45 gallon/205 litre Drums is of major concern to the Environment Agency. Firms prosecuted by the authority for contravening the Water Resources Act of 1991 have now reached unprecedented levels.

We can now offer the solution with environmentally sound storage and transit of drums through the following product range.

Only a sample of the range has been included in this guide, so please do not hesitate to contact us with your specific requirements.

MODEL FL100

Extra large capacity funnel with integral hinged lid. High sides and ribbed surface to hold filters etc. For drainage. Funnel sits over the rim of the drum and is therefore suitable for use with both open and closed head 205 litre drums.

NON DRIP SPLASH-FUNNELS

Large diameter Polythene Drum Funnels make the task of pouring liquids into drums easy and splash free. Hinged lid to reduce vapour escape and keep funnel free from dirt and debris. Suitable for open and closed head 205 litre drums.

FUNNELS				
Item Description	Ø Dia.	Height	Weight	Cap
FL50	530mm	85mm	3Kg	12lt
FL100	640mm	150mm	4Kg	20lt

MODEL FL100

Large diameter funnel with integral hinged lid, suitable for use with closed head 205 litre drums. Smooth internal surface for quick drainage.
