Oil Safe

The Oil Safe Container System is especially designed and manufactured for use in automotive and mechanical workshops, industrial plants, mines, factories, farms, even in home garages.

Thanks to Oil Safe's unique design, the problems of machine damage or premature failure caused by accidental or unnoticed contamination of lubricating oils and fluids are virtually eliminated.

What's more, the containers and caps which make up the Oil Safe system are completely interchangeable. It's a way to ensure that the system is more versatile and more useful in more applications.

- Save time and money.
- Minimise spills and wastage.
- Improve your lubrication procedures.
- Protect your valuable investment in lubricants and machinery.

Industrial Grade

*Easier,
faster & cleaner*

- Wide container/drum opening allows rapid, no-spill filling.
- Flexible – all lids fit all containers and accessories.
- All components are totally rust-free and UV resistant.
- Push-pull pouring spout allows accurate, no-spill dispensing.
- All components are manufactured from high-grade highest density polyethylenes to ensure long term indoor and outdoor durability.
- See-through, graduated containers make fluid levels easy to monitor and control.
- Cleaning and service of all components is especially easy.

OIL CANS WITH SPOUT VALVE

Available in 3 litre and 5 litre sizes

- Comes complete with sliding, 'O'-ring pouring spout and integrated breather port for precise control of oil flow.
- Lid also features ergonomic carry handle/hanging hook for easy handling.
